CAREER OBJECTIVE

Recent graduate in Artificial Intelligence and Data Science seeking an entry-level role to apply skills in Python, SQL, machine learning, and cloud computing. Passionate about solving problems through data-driven solutions and eager to contribute to impactful projects.

EDUCATION

B.E. in Artificial Intelligence and Data Science

- SDM Institute of Technology, Ujire — Dec 2021- Jun 2025

Pre-University (PCMB)

- SDM Pre-University College, Ujire — May 2019 - Jun 2021

SKILLS

- **Programming:** Python, SQL
- **Data & Machine Learning:** Data Analysis, Feature Engineering, Predictive Modeling, Model Evaluation
- **Tools & Platforms:** Excel, Power BI, Jupyter Notebook
- **Cloud & Deployment:** Google Cloud Platform (GCP), APIs, Model Deployment
- **Version Control:** Git

EXPERIENCE

Technical Lead, Berukodige Farm (Early-Stage Startup) — Jun 2025 - Present

- Leading technology strategy for an upcoming Agri-based startup, focusing on automation and digital solutions.
- Exploring data-driven approaches to optimize farm operations and decision-making.
- Planning and developing technical infrastructure for future product and platform development.

Operations Automation Intern, Sanjivini Eco Solutions Pvt ltd, Bengaluru — Feb 2025 - Jun 2025

- Automated CRM and e-commerce workflows using Python and LLM-based solutions.
- Built and deployed automation pipelines on GCP to improve operational efficiency.
- Collaborated with teams to streamline processes and enhance system scalability.

Market Research Intern, CodeNimbus Solutions, Bengaluru — Nov 2023 - Dec 2023

- Analyzed market and customer data to identify trends and actionable insights.
- Supported data-driven decision-making for campaigns through audience analysis.
- Conducted competitor research to assist in strategic planning.

PROJECTS

Crop Recommendation System, GitHub — May 2024 - Jul 2024

Tech Stack: Python, Machine Learning

- Built a machine learning model to recommend optimal crops based on soil and environmental factors.
- Implemented Gaussian Naive Bayes algorithm achieving **92.53% accuracy.**
- Performed feature analysis to identify key factors influencing crop selection.

Customer Churn Prediction, GitHub — Jul 2024 - Aug 2024

Tech Stack: Python, Machine Learning

- Developed a predictive model to identify customers at risk of churn.
- Applied Random Forest Classifier achieving **90.76% accuracy.**
- Conducted data preprocessing and feature engineering to improve model performance.

ACHIEVEMENTS

- Secured 3rd place in a 24-hour National Hackathon conducted by RV Institute of Technology & Management.
- Won **2nd place** in 12-hour Innovate-A-Thon for innovative problem-solving and teamwork. (SDMIT)

CERTIFICATIONS

- Data Science Job Simulation, BCGX Forage. — Aug 2024
